

## What is the best way to ship a C4 transmission to Dynamic?

We recommend that you purchase a 120 quart cooler, similar to the one pictured below.

These are typically available from Walmart for a very reasonable price. They are perfect for protecting your unit during shipping and can be reused if you ever need a freshen up.

1. **Drain the unit of all fluid and remove the bellhousing as well as any shifter linkage, transmission mounts, dip sticks or special fittings and shields.**
2. Put packing material all around the unit to prevent movement inside the cooler.
3. Put your name and contact info in a plastic bag inside the cooler and secure the lid.

We recommend sealing the lid perimeter with duct tape and then securing the cooler closed with a ratchet strap around it.

We suggest going through [www.pirateship.com](http://www.pirateship.com) to get the best shipping price.

Bring it to UPS or Fedex and ship it to us:

Dynamic Racing Transmissions

104-5 Enterprise Drive

Unit 1

North Branford CT 06471.

We will arrange shipment back to you using your cooler when the build is complete.
